Abstract submission deadline dates ... 307
abstracts, Revised instructions for submission of ... 328
Abstracts of papers presented in person
  Seattle (27 July - 1 August 1986)... 33
  Chicago (18-21 August 1986)... 34-35
  Dallas (22-25 March 1987) ... 62-72, 118-119
  Blacksburg (27-29 May 1987) ... 105-117, 237
  San Francisco (17-20 August 1987) ... 183-234, 290, 292
  Kyoto (3-5 September 1987) ... 237, 293
Abstracts of papers presented by title ... 36-44, 73, 120-122, 296-304, 329-331
abstracts, Revised instructions for submission of ... 328
annual reports, Officers' and Editors' ... 332-360
award, COPSS Presidents' ... 371

Calendar of events, International ... 11-14, 86-87, 133-138, 239-241, 271-275, 316-320
Candidate nominations for President-Elect and membership in the IMS Council ... 371
Committees, IMS Standing ... 160, 333-334
conferences, Selected statistical ... 15-16, 127-132
COPSS Presidents' award ... 371
Council, Candidate nominations for President-Elect and membership in the IMS ... 371
Council meetings, Minutes of Executive Committee and ... 361-366

deadline dates, Abstract submission ... 307
dues for 1988, Membership ... 367

e-mail directory, New IMS (Ronald Pyke) ... 257
e-mail, An introduction to (Peter D.M. Macdonald) ... 258-259
e-mail directories, Some other ... 257
Editors' annual reports ... 353-360
Emperor Joseph II: 1741-1790 ... 305-306
Employment opportunities ... 23-32, 88-92, 150-154, 242-245, 284-289, 372-389
Executive Committee and Council meetings, Minutes of ... 361-366

fellows, New IMS officers, editor, and ... 260-262
fellows, Nomination form for ... 368-369
financial statements, Treasurer's annual report & ... 337-351

instructions for submission of abstracts, Revised ... 328

Kolmogorov, Andrei Nikolaevich: 1903-1987 ... 324-325

medallion for its publications, IMS wins ... 85
meetings, Complete programs/announcements
  Blacksburg, Virginia (27-29 May1987) ... 7-10, 97-104
  Dallas, Texas (22-25 March 1987) ... 3-6, 49-61
  San Francisco, California (17-20 August 1987) ... 123-125, 161-182
  Kyoto, Japan (3-5 September 1987) ... 126, 235, 293
  Fort Collins, Colorado (August 1988) ... 238
  Boston, Massachusetts (27-30 March 1988) ... 307-309
  Madison, Wisconsin (16-18 May 1988) ... 310
  Interface Symposium (21-23 April 1988) ... 311-313
  Summer Research Conference (18-24 June 1988) ... 314-315
members, New IMS ... 2, 93-94, 246-251, 276-279, 370-371
Membership dues for 1988 ... 367
membership in the IMS Council, Candidate nominations for President-Elect and ... 371
Minutes of Executive Committee and Council meetings ... 361-366

Adler, André and Andrew Rosalsky.
A generalization of the Chow-Robbins "fair" games problem (preliminary report), 201-32 (p. 195).
Ahmed, Syed Ejaz and A.K. Md. Ehsanes Saleh.
On preliminary-test and shrinkage estimation of the mean vector of a multivariate normal distribution in a two-sample problem, 199-37 (p.72).
Ahsanullah, Mohammad.
On random record values of the exponential distribution, 199-5 (p.63).
Some characterizations of the normal distribution, 201-86 (p. 211).
Akritas, Michael G.
Person-type goodness-of-fit tests: the univariate case, 201-173 (p. 292).
Alam, Khursheed.
Limiting distribution of a convolution, 201-56 (p. 203).
Alam, Khursheed; M. Haseeb Rizvi, and K.M. Lal Saxena.
Selection of problems in life testing: application or Dirichlet priors, 201-113 (p. 218).
Albanese, Richard C. *see* Gupta, Ramesh C.

Alexander, Kenneth S.
Possible cluster sets for the LIL sequence in Banach space, 87t-52 (p.298).
Andersson, Steen; John I. Marden, and Michael D. Perlman.
A general class of multivariate normal models, including growth-curve models and nested missing data models, 199-32 (p.70).
Andrews, Donald W.K.
Random cell chi-square diagnostic tests for econometric models, 201-3 (p. 186).
Aras, Girish.
Second-order sequential estimation of the mean exponential survival time under random censoring, 200-11 (p. 108).
Sequential point estimation based on *U*-statistics, 201-88 (p. 211).
Arnold, Barry C. and David J. Strauss.
Bivariate distributions with exponential conditionals, 87t-50 (p. 298).
Bivariate distributions with conditionals in prescribed exponential families, 87t-51 (p. 298).
Asiribo, Osebekwin and John Gurland.
Some new series expansions for the distribution of the multiple correlation coefficient, 199-9 (p. 64).
Asiribo, Osebekwin *see also* John Gurland.
Athreya, K.B.
Polya urn schemes in Bayesian finite population sampling: a limit theorem, 87t-73 (p. 302).

Bagai, Isha and Subhash C. Kochar.
Tests for shift in location under the competing risks model, 87t-85 (p. 330).
Distribution-free tests for stochastic ordering among two independent competing risks, 87t-86 (p. 330),
Bagai, Isha *see also* Kusum, Kalpana.
Bagchi, P. and Irwin Guttman.
The prediction problem when dealing with circular data, 87t-64 (p. 301).
Bayesian analysis of circular data, with and without spuriosity, 87t-65 (p. 301).
Hierarchical models for the Fisher-von Mises distribution, 87t-66 (p. 301).
Bai, Z.D. and Y.Q. Yin.
Necessary and sufficient conditions for almost-sure convergence of the largest eigenvalue of a Wigner matrix, 200-33 (p. 114).
Bailer, A. John and Walter W. Piegorsch.
Statistical issues in evaluating area under concentration-time curves (Preliminary report), 87t-81 (p. 329).
Bar-Lev, Shaul K. and Peter Enis.
On dual-conjugate families, 201-78 (p. 208).
Barsky, David J.
Inequality methods for percolation models, 201-132 (p. 224).
Basawa, Ishwar V.
Inference for stochastic processes: some recent developments, 200-5 (p. 106).
Bayarri, M.J. and Morris H. DeGroot.
Observables, unobservables, and likelihoods, 199-39 (p. 119).
Beder, Jay H.
On the zero-one laws of Kallianpur and Driscoll, 199-17 (p. 66).
Ben, Marta Garcia and Victor J. Yohai.
Asymptotic behavior of robust M-estimates in a complete randomized blocks layout, 197-38 (p. 34).
Beran, Jan.
Statistical aspects of stationary processes with long-range dependence, 201-130 (p. 223).
Berger, Roger L.
Some inadmissible likelihood-ratio tests concerning normal means, 201-13 (p.189).
Berger, Roger L.; Dennis D. Boos, and Frank M. Guess.
Tests and confidence sets for comparing two mean residual life functions, 201-39 (p. 197).
Berman, Simeon M.
Extreme sojourns of diffusion processes, 200-42 (p. 116).
Bertin, Emile and Radu Theodorescu.
Discrete $\alpha$-unimodality, 87t-17 (p. 41) and 87t-45 (p.297).
Bhandari, Subir Kumar and Arup Bose.
On selecting more than one most or least likely events, 87t-10 (p. 38).

Bhandari, Subir Kumar and Atasi Roy Choudhuri.
On two conjectures about two-state selection problems, 87t-5 (p. 37).
Bhandari, Subir Kumar *see also* Purkayastha, Sumitra.
Bhanja, Joydeep and J.K. Ghosh.
Inference about a parameter in the presence of a large number of incidental parameters, 87t-26 (p. 73).
Bhapkar, Vasant P.
Partial ancillarity with nuisance parameters in contingency table analysis, 201-80 (p. 209).
On conditionality and likelihood principles in analysis of contingency tables, 202-1 (p. 237).
Bhat, U. Narayan *see* Lal, Ram.
Bhattacharya, P.K. and Ashis Gangopadhyay.
Nonparametric estimation of a conditional quantile function, 201-90 (p. 212).
Bhimasankaram, Pochiraju.
Generalized inverses of partitioned matrices with applications to linear models, 201-65 (p.205).
Bickel, Peter J. and J.K. Ghosh.
A decomposition for the likelihood-ratio statistic and the Bartlett correction: a Bayesian arguement, 87t-15 (p. 40).
Boos, Dennis D.
Tests for homogeneity of dispersion in one- and two-way designs, 201-117 (p. 219).
Boos, Dennis D. *see also* Berger, Roger L.
Borowiak, Dale.
Testing nonnested linear models, 201-144 (p. 227).
Bose, Arup *see* Bhandari, Subir Kumar.
Bradley, Richard C.
Survey or limit theorems for weakly dependent random variables with a view toward statistical inference, 201-76 (p. 208).
Breiman, Leo *see* Koyak, Robert.
Buehler, Robert J. and Yong Goo Lee.
Independence and factorization, 87t-8 (p. 38).
Buja, Andreas *see* Hastie, Trevor J.

Carroll, Raymond J. *see* Davidian, M.; Stefanski, Leonard A.
Cerrito, Patricia B.
A means of improving stochastic models allowing interaction among individuals, 201-14 (p. 189).
Chaganty, N.R. and Samjeev Sabnis.
Saddlepoint approximation for the density of the ratio of two statistics, 200-38 (p. 115).
Chaganty, N.R. and Jayaram Sethuraman.
Strong large deviation and local time limit theorems, 200-41 (p. 116).
Chakrabarti, S. and M.M. Desu.
A test for comparing several treatments with a control when the data are subject to unequal patterns of censoring (preliminary report), 201-108 (p. 216).
Chambers, Daniel W. and Eric V. Slud.
A martingale approach to central limit theorems for functionals of a Gaussian process, 201-125 (p. 222).
Chan, N.H.
Asymptotic inference for unstable processes with drift, 200-25 (p. 112).
On the parameter inference of nearly nonstationary time series, 201-120 (p. 220) and 87t-56 (p. 299).
Chan, W.T. *see* Nagaraja, H.N.
Chanda, Kamal C. and Chanda, Kamal C.
Asymptotic estimate of probability of misclassification for a discriminant rule based on density estimates, 201-79 (p. 209).
Chandra, Tapas K. and Tapas Samanta.
On the second-order local comparison between perturbed maximum-likelihood estimators and Rao's statistic as test statistics and related results: the one-parameter case, 87t-11 (p. 39).
Chang, I-Shou and C.A. Hsiung.
Likelihood process in a parametric model of censored data with staggered entry: asymptotics and applications, 201-46 (p. 200).
Chang, I-Shou *see also* Hsiung, C.A.

Chang, Myron N.
Moments of the Kaplan-Meier estimator, 200-46 (p. 118).
Chen, Hung.
Estimation of semiparametric generalized linear models, 201-28 (p. 194).
Chen, Pinyuen.
Truncated inverse sampling procedure for multinomial selection, 201-136 (p. 225).
Chen, Yuan Yan.
Belief function inference, 201-164 (p. 233).
Cheng, Philip E.
Nonparametric estimation of a survival curve under dependent censorship, 201-12 ( p. 189).
Chiu, Shean-Tsong.
A feature-preserving smoother, 199-30 (p. 70).
A feature-preserving smoother with application to the coal-mining disaster data of Britain, 200-29 (p. 113).
Inference for time series with mixed spectrum, 201-111 (p. 217).
Choi, Youn J. and Norman C. Severo.
Transition probabilities for a modified general stochastic epidemic model, 201-63 (p. 205).
Chopra, Dharam V.
Investigations on the existence conditions of some balanced arrays, 199-22 (p. 68).
Choudhuri, Atasi Roy *see* Bhandari, Subir Kumar.
Christofides, Tasos and Robert J. Serfling.
*U*-statistics based on multidimensionally indexed arrays of random variables, 201-60 (p. 204).
Cline, Daren B.H.
Optimal kernel estimation of densities, 201-142 (p. 227).
Cohen, Arthur and H.B. Sackrowitz.
Exact tests that recover interblock information in balanced incomplete block designs, 199-1 (p. 62).
Cohen, Joel E.
Food Webs: Random graphs are useful in ecology!, 200-16 (p. 109).
Cohn, Harry and Fima C. Klebaner.
Geometric rate of growth in Markov chains with applications to population-size-dependent models with dependent offspring, 87t-33 (p. 120).
Conaway, Mark, Carolyn Pillers, Tim Robertson, and Jim Sconing.
On using Pincus' test for testing against a simple tree order restriction, 201-24 (p. 193).
Costanza, M.C. *see* Hamdy, H.I.
Cover, Thomas M.
Universal portfolios, 201-110 (p. 217).
Cowan, Richard *see* Staudte, Robert G.
Csörgő, Miklós and Lajos Horváth.
Asymptotics for $L_p$-norms of naive estimators of densities, 87t-37 (p. 122).
Cullis, B.R. see McGilchrist, C.A.
Czitrom, Veronica *see* Keating, Jerome P.

Dabrowska, Dorota M.
Uniform consistency of nearest-neighbor and kernel conditional Kaplan-Meier estimates, 87t-35 (p. 121).
Rank tests for matched-pair experiments with censored data, 87t-48 (p. 297).
Kaplan-Meier estimate on the plane, 87t-49 (p. 298).
Daley, D.J.
The variation distance between Poisson distributions, 87t-18 (p. 41).
Darmanto, S. *see* Mukhopadhyay, Nitis.
Das, K. and N.C. Giri.
Estimation of variance components in an unbalanced hierarchical model under heteroscedasticity, 87t-43 (p. 296).
On improved estimation in the balanced hierarchical mixed model, 87t-80 (p. 329).
Davidian, M. and R.J. Carroll.
Variance function estimation in heteroscedastic regression models, 199-2 (p. 62).
DeGroot, Morris H. *see* Bayarri, M.J.
Del Pino, Guido E.
A coordinate free approach to score tests, 201-146 (p. 228).
Desu, M.M. *see* Chakrabarti, S.

Devroye, Luc.
Nonparametric density estimates with improved performance on given sets of densities, 199-11 (p. 64).
Dey, Dipak K
Simultaneous estimation of eigenvalues, 201-55 (p. 203).
Dey, Dipak K. *see also* Gelfand, Alan E.
Dhar, S.K.
Minimum distance method of estimation in an additive effects outliers model, 201-93 (p. 212).
Diaconis, Persi.
Theorems of Poincaré and de Finetti, 199-8 (p. 63).
Donoho, David L. and Richard C. Liu.
Geometrizing rates of convergence, 201-49 (p. 201).
Pathologies of some minimum-distance estimators, 87t-67 (p. 301).
On minimax estimation of linear functionals, 87t-68 (p. 301).
Drost, F.C., Jacobus Oosterhoff, and W.C.M. Kallenburg.
The power of tests of fit under non-robust estimation of nuisance parameters, 201-6 (p. 187).
Duan, Naihua and Ker-Chau Li.
Slicing regression: a link-free regression method, 201-160 (p. 232).

Easton, George S.
Some computational aspects of saddlepoint approximations, 201-150 (p. 229).
Eaton, Morris L.
Linear Models and de Finetti-Type Theorems, 199-7 (p. 63).
Eddy, William F.
Parallel computing: the challenge for statistics, 199-10 (p. 64).
Enis, Peter *see* Bar-Lev, Shaul K.
Eubank, Randall L.
Testing hypotheses with components of phi-squared, 201-166 (p. 233).

Faulkner, Thomas L. and K.M. Lal Saxena.
Selection procedures for largest availability among $k$, 201-52 (p. 202).
Ferguson, Thomas S. and Janis P. Hardwick.
Stopping rules for proofreading, 199-35 (p. 71).
Ferreiro, Osvaldo M.
Estimation of the integral of the trajectory of a continuous-time AR (1) process with equally-spaced sampling, 201-145 (p. 228).
Field, Christopher A.
Small sample asymptotics: an overview, 201-11 (p. 189).
Fill, James Allen.
Asymptotic expansions for large deviation probabilites in the weak and strong laws of large numbers, 201-112 (p. 218).
Finster, Mark P.
Accurate estimation for multivariate data with applications to large-scale Monte Carlo studies, 198-105 (p. 34).
Fisher, Nicholas I. and Peter G. Hall.
Bootstrap methods for directional data, 201-115 (p. 219).
Fleming, T., P. Grambsch, and T. Therneau.
Residuals for censored data, 201-151 (p. 229).
Fraser, D.A.S.
On conditional inference for a real parameter, 201-53 (p. 202).
Frees, Edward W.
Infinite order $u$-statistics, 87t-38 (p. 122) and 201-10 (p. 188).
From, Steven G. and K.M. Lal Saxena.
Estimating parameters from mixed samples, 201-23 (p. 192).

Gangopadhyay, Ashis *see* Bhattacharya, P.K.
Gastwirth, Joseph L. and Jane-Ling Wang.
Control prercentile test procedures for censored data, 87t-42 (p. 296).
